About Us

The Fowler Company is an Ohio company with national experience, headquartered in Oakwood, Ohio. Fowler is committed to providing our clients the highest value Facility Services, engineering, construction and maintenance. Fowler is a progressive company that brings ingenuity to the workplace by integrating technologies, products and services that create environments which optimize the relationship between people and their workspace, delivering higher efficiency, reliable, lower cost utilities. Fowler is committed to client satisfaction, unquestioned integrity and delivering on promises.

The founder, Jim Fowler, started The Fowler Electric Company in 1963 to serve a small industrial client base. Jim Fowler's honest approach to construction and service became a trademark of his company's growth. In the late 1970's, Eugene Trela assumed control of the company and under his ownership Fowler grew in reputation as a high value electrical contractor. Eugene Trela's son, Rich, took over operational control in 1997 and ownership in 2002. Today, Fowler offers a full spectrum of Facility Services including electrical, mechanical, construction, controls and plumbing services. The Fowler Company's history of listening to and working with its industrial and commercial customers has led to our design/build/install approach for fulfilling and solving our customer's needs and problems.

Our promise of "World Class" service:

Fowler will provide a highly responsive resource to solve facilities related problems. Fowler responds to all facility and process issues, from minor control changes to 24 hour emergency repair. In summary, a "go to" resource that will react to mechanical, plumbing and electrical problems with an intense, deliberate, root cause problem solving focus.

Our Value Proposition

Your Building and its Components are Your Greatest Assets

Fowler creates high quality solutions customized to the specific needs and critical requirements for your facility, designed and engineered to maximize the facilities' level of efficiency, asset life and value while controlling operating expenses and reducing energy costs. Fowler produces environments that optimize your building, personnel and business productivity adding to your profitability and free up capital for reinvestment essential to your prosperity.

Our Capabilities:

The Fowler Company can be part of your engineering, construction and service team. Our engineering management, company diversity, and knowledge of industrial facilities make Fowler the unique choice for all of your Mechanical, Electrical, Pipefitting, Construction and Building Management Controls needs. Our service and management team brings extensive experience in high/medium voltage electrical, mechanical and infrastructure management. Fowler's engineering vision, computerized tasking and disciplined labor allows for the efficient implementation of construction, energy, safety or preventative maintenance plans. Our team has the experience working in facilities such as yours, and the experience in installing your equipment on various projects. This experience and the firsthand knowledge of your critical systems enable us to appropriately allocate and focus our resources on the equipment that directly impacts your bottom line.

Fowler's Service Excellence

A Trusted Partner

The Fowler Company's unparalleled focus and responsiveness to the unique Service needs and challenges of a diverse clientel.

Facility Management Services

- Building System Infrastructure
- Building Automation Systems
- Building Space Installation, Retrofit Upgrade & Commissioning
- Fire Systems
- Systems Integration - Fire, Security & Mechanical Integration
- HVAC/Mechanical/Electrical Systems
- Generators & Emergency Power
- Technical Operations
- Energy Analysis
- Building & Process Systems Optimization
- Multi-Utilities Metering
- Critical Facilities - Power & Control Systems
- On Call 24/7 Service
- Heating/Cooling
- Emergency Power Systems & Monitoring
- Project Management
- Renovation/New Construction
- Design / Build
- Feasibility Studies & Cost Analysis

Mechanical Services

- Boiler Services
- Building Automation Systems
- Calibration
- Chiller Services
- Commercial & Industrial Kitchens
- Custom Duct Work
- Customized Maintenance Programs
- Demand Reduction Systems
- Environmental Control Systems
- Fabrication/Prefabrication
- High Purity Systems & Clean Rooms
- HVAC
- Indoor Air Quality
- Industrial & Process Piping
- Instrumentation
- Plumbing
- Refrigeration
- Sheet Metal
- Site Utilities & Metering
- Temperature & Process Controls
- Testing, Adjusting & Balancing
- Wireless Remote Monitoring Additional Services
- Commissioning
- Conceptual Estimating
- Design/Build Engineering Services
- System/Equipment Selection

Electrical Services

- AC/DC Power Systems
- Alternative Power Solutions
- Building Lighting
- Cable Tray Systems
- CATV
- CCTV
- Card Access and Security Systems
- Cogeneration
- Complete Distribution Systems
- Customized Maintenance Programs
- Emergency Power Generators/UPS Systems
- Explosion Proof Systems
- Fire Alarm Systems
- Grounding & Cathodic lightning Protection Systems
- High, Medium & Low Voltage Systems and repairs
- Infrared Imaging
- Inspection
- Instrumentation
- New Power Service Installations
- Overhead & Underground Installations
- Life Safety
- Machine Controls & Troubleshooting
- Motor Control & Variable Speed Drive Systems
- Network Design, Install & Integration Service
- Paging, Sound & A/V Systems
- Panel Fabrication/Integration
- Roadway, Runway, Traffic Signal & Intelligent Lighting & Signage
- Site Utilities
- Structured Cabling Systems
- Substation Installation & Maintenance
- Temperature Control
- Building Automation
- Commissioning & Start Up
- Conceptual Estimating
- Design/Build
- Engineering Services
- Oil Analysis – Transformers
- Preconstruction Services
- Project Management
- Scheduling & Planning

Web Based Electronic Software System

Allows On-Line Management of:

- Service Requests & Dispatch Status
- Equipment Service & Maintenance
- Remote Building Automation System Access
- Remote Metering & Status of Utilities
